Foreword	xix
Preface	xxiii
Acknowledgments	xxv
Part I Fundamentals of Plasmonics	
Introduction	3
1. ELECTROMAGNETICS OF METALS	5
1.1. Maxwell's Equations and Electromagnetic Wave Propagation	5
1.2. The Dielectric Function of the Free Electron Gas	11
1.3. The Dispersion of the Free Electron Gas and Volume Plasmons	15
1.4. Real Metals and Interband Transitions	17
1.5. The Energy of the Electromagnetic Field in Metals	18
2. SURFACE PLASMON POLARITONS AT METAL / INSULATOR INTERFACES	21
2.1. The Wave Equation	21
2.2. Surface Plasmon Polaritons at a Single Interface	25
2.3. Multilayer Systems	30
2.4. Energy Confinement and the Effective Mode Length	34
3. EXCITATION OF SURFACE PLASMON POLARITONS AT PLANAR INTERFACES	39
3.1. Excitation upon Charged Particle Impact	39

3.2. Prism Coupling	42
3.3. Grating Coupling	44
3.4. Excitation Using Highly Focused Optical Beams	47
3.5. Near-Field Excitation	48
3.6. Coupling Schemes Suitable for Integration with Conventional Photonic Elements	50
4. IMAGING SURFACE PLASMON POLARITON PROPAGATION	53
4.1. Near-Field Microscopy	53
4.2. Fluorescence Imaging	57
4.3. Leakage Radiation	59
4.4. Scattered Light Imaging	62
5. LOCALIZED SURFACE PLASMONS	65
5.1. Normal Modes of Sub-Wavelength Metal Particles	66
5.2. Mie Theory	72
5.3. Beyond the Quasi-Static Approximation and Plasmon Lifetime	73
5.4. Real Particles: Observations of Particle Plasmons	77
5.5. Coupling Between Localized Plasmons	80
5.6. Void Plasmons and Metallic Nanoshells	85
5.7. Localized Plasmons and Gain Media	87
6. ELECTROMAGNETIC SURFACE MODES AT LOW FREQUENCIES	89
6.1. Surface Plasmon Polaritons at THz Frequencies	90
6.2. Designer Surface Plasmon Polaritons on Corrugated Surfaces	93
6.3. Surface Phonon Polaritons	101
Part II Applications	
Introduction	107
7. PLASMON WAVEGUIDES	109
7.1. Planar Elements for Surface Plasmon Polariton Propagation	110
7.2. Surface Plasmon Polariton Band Gap Structures	114
7.3. Surface Plasmon Polariton Propagation Along Metal Stripes	116
7.4. Metal Nanowires and Conical Tapers for High-Confinement Guiding and Focusing	124
7.5. Localized Modes in Gaps and Grooves	129

<i>Contents</i>	ix
7.6. Metal Nanoparticle Waveguides	131
7.7. Overcoming Losses Using Gain Media	138
8. TRANSMISSION OF RADIATION THROUGH APERTURES AND FILMS	141
8.1. Theory of Diffraction by Sub-Wavelength Apertures	141
8.2. Extraordinary Transmission Through Sub-Wavelength Apertures	144
8.3. Directional Emission Via Exit Surface Patterning	150
8.4. Localized Surface Plasmons and Light Transmission Through Single Apertures	153
8.5. Emerging Applications of Extraordinary Transmission	157
8.6. Transmission of Light Through a Film Without Apertures	157
9. ENHANCEMENT OF EMISSIVE PROCESSES AND NONLINEARITIES	159
9.1. SERS Fundamentals	159
9.2. SERS in the Picture of Cavity Field Enhancement	163
9.3. SERS Geometries	165
9.4. Enhancement of Fluorescence	170
9.5. Luminescence of Metal Nanostructures	173
9.6. Enhancement of Nonlinear Processes	175
10. SPECTROSCOPY AND SENSING	177
10.1. Single-Particle Spectroscopy	178
10.2. Surface-Plasmon-Polariton-Based Sensors	188
11. METAMATERIALS AND IMAGING WITH SURFACE PLASMON POLARITONS	193
11.1. Metamaterials and Negative Index at Optical Frequencies	194
11.2. The Perfect Lens, Imaging and Lithography	198
12. CONCLUDING REMARKS	201
References	203
Index	221
